## Chattanooga 2018 – Transforming Transportation Training October 7-11 NTTD's Annual Conference and Professional Development Opportunity

*Each year NTTD highlights innovative training policies, programs and technologies that serve the unique needs of the transportation community, bringing together DOT staff and trainers, LTAP personnel, and national training resource experts from federal, university and private sector organizations. Members of the transportation training community exchange ideas about training innovations and resources, develop collaborative relationships and networks, and learn from leading experts in the field.*

### THANKS!

2017 represented a missed opportunity due to the unfortunate timing of Hurricane Nate, landing as it did on the opening day of the planned 2017 NTTD conference in Clear Point, AL. We are grateful to all the hard work of the Conference Planning team lead by Mary Leah Coco of the Louisiana Department of Transportation and Development, and the local host team at Alabama DOT. The new conference committee is focused on making the 2018 program an even more valuable opportunity for the network. [Please save the dates](#). Also, our thanks to our loyal 2017 sponsors who transferred their sponsorship to 2018:

- [Cornerstone](#)
- [Pavia Systems](#)
- [NETWC & the National Network for the Transportation Workforce](#)

### Help TC3 Identify Your Training Needs!

TC3 strives to provide quality training to the technical workforce, and your input helps steer the development of our curriculum! We've crafted a short, 11-question survey to help us collect valuable insight into your training needs.

No one knows the job better than you, which is why your input is so important. Please take a couple minutes and share your feedback with us!

TAKE OUR SURVEY

### NETWORK REQUEST

#### *Electrical training for front line maintainers, specifically for traffic signals*

I work for Connecticut DOT and we're working with our LTAP to develop a training program for our electrical maintenance employees. We are interested in learning what other DOT's are doing for electrical training for front line maintainers, specifically for traffic signals. Please respond to [Susan.Baillargeon@ct.gov](mailto:Susan.Baillargeon@ct.gov)
